

Photo: Kim Funk

This week's feature is a slideshow of some of the "secret" gardens of Jersey City. Who would've guessed what hid behind those walls and buildings? Some of us are growing flowers and shrubs while others grow fruit trees, vegetables, greens, etc. There has been a groundswell of interest in growing things at home. No wonder, who wants to eat a bad tomato and be inside all weekend? As more photos are submitted more albums will be put up. To find out more about gardening/outdoor events in Jersey City visit our [calendar page](#) .
